

Thermography Client Preparation and Recommendations

Prior to the appointment, the client must be advised:

- No breast surgery, chemotherapy or radiation treatments 3 months prior.
- No breast biopsy for one month prior.
- Lactation: Imaging is recommended if there is a problem or concern, but a baseline is not recommended for at least 3 months after the last active breastfeeding.

24 Hours Prior

- Avoid exercise or heavy physical activity.
- No massage or lymph treatments.
- No chiropractic adjustments.
- No saunas, steam bath or hot tub.
- No hot or cold packs.
- Avoid spicy food 24 hours prior to imaging
- No Alcohol –*preferred*

Day of Exam:

- Avoid deodorant or creams on the skin, especially oils.
- Absolutely no heat lamps or sunburn. You will have to reschedule.
- Do not shave area to be imaged.
- No food or drink 2 hours before imaging and no chewing gum.
- No coffee or cigarettes for at least 2 hours before imaging.
- Client must remove all jewelry in the area to be imaged.

Thermography Informed Consent

I consent to a thermography procedure by a certified clinical thermographer on the staff of Thermal Imaging Services. I understand that a thermographer is a photographer and not trained nor educated to read the results of my thermogram. I have been informed that a radiologist or a medical doctor trained to read thermograms will read my thermogram and that I will be provided with the findings and images in a report form. I understand that thermography in no way replaces mammography, but rather is an adjunct procedure to a mammogram. I also understand that a biopsy is the only definite indicator for any high breast risks that might be present.

Initial all that apply:

_____ I have had a mammogram(s) in the past and am choosing to have a thermogram today.

_____ I have never had a mammogram and am choosing to have a thermogram today.

_____ I have had a thermogram(s) in the past and am choosing to have a follow-up today.

_____ I understand that is my responsibility and decision to seek out further medical attention and undergo an ultra-sound, mammogram or biopsy if breast disease is indicated from a thermogram report.

_____ I understand that a thermogram examines the physiological processes of the body versus the anatomical aspects of the body. I am consenting to this procedure without any pressure from a staff member of Thermal Imaging Services.

			Pelvic Region?	<input type="radio"/>	<input type="radio"/>

Have you consumed alcohol in the past 24 hours?

Do you have any special concerns or are there any details related to the information above?

Procedure: *You will be imaged with a state of the art infrared imaging camera in comfortable and controlled surroundings. Your thermal imaging baseline reports will provide information about current and future conditions only and does not diagnose breast disease. Thermal imaging should be correlated with other medical investigative methods to better direct definitive testing for diagnosis and treatment. It does not replace any other breast examination.*

Patient Disclosure: *I understand that the report generated from my images is intended for use by a trained health care provider to assist in evaluation and treatment. I further understand that the report is not intended to be used by myself for evaluation or self-diagnosis. I understand that the report will not tell me whether, I have any illness, diseases, or other conditions, but will be an analysis of the images with respect only to the thermographic findings discussed in the report.*

By signing below, I certify that I have read and understand the statement above and consent to the examination.
